

Quality Policy

The Vision Engineering is committed to the satisfaction of our customer and doing things correctly the first time. Risk assessment is a critical tool to help us achieve our objectives.

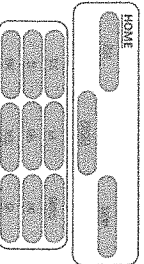

To drive this commitment and to demonstrate our compliance to ISO 9001:2015 we set quality objectives for ourselves, establish systems to measure our performance, review measurements, and take action to continually improve our operations.

Every employee is obligated and empowered to play a role in supporting our commitment to quality.

Bernie Sherwill
General Manager
